Textile Research

Vol. X, 1939-40

RESEARCH REPORTS AND ARTICLES

Subject Index

	PAGE		PAGE
Behavior of Gelatins and Glues in Size Baths at Low Concentrations	341	Pectic Substance in Cotton and Its Relation to the Properties of the Fibre	269
Combination of Wool Protein with Acid and Base: Hydrochloric Acid and Potassium Hydroxide	181, 229	of Cotton Fibres in Relation to Growth	449
Compression Tests on Rayon Flock	425	Photochemical Decomposition of the Cystine in Wool	17
Concerning the Existence of Fractions of the Sericin in Raw Silk	221	Refractive Indices of Textile Fibres: Double Variation Method for the Determination of	79
Determination of Regain of Sized Rayon Warps: Checking the Efficiency of One Type of Warp Conditioner	420	Relation and Cation Exchange to the Acidic Properties of Cotton	405
Determination of Uronic Acids in Cellulosic Materials	109	Relations Between the Food and Silk of Silkworms	462
Effects of Drying Conditions on Properties of Textile Yarns	493	Removal of a Sulfur Black Dye from Suspension by Flotation Methods	201
Electrodialytic Estimation of Ash and Acidic and Basic Groups in Textile Fibres	380	Result Obtained by Use of an Oil-type Size on Viscose Rayon	446
Equipment for Conditioning Materials at Constant Humidities and Elevated Temperatures	334	Sampling of Domestic Wool for Shrinkage Determination	193
Guanaco Fibres	22	Technical Evaluation of Textile Finishing Treatments, Flexibility and Drape as Measurable Properties of Fabric	5
Influence of Electrolytes on the Ballo-Electric Effect	149	Use of Rank Correlation for Comparison of Data	453
Method of Fibre-Length Analysis Using the Fibrograph	510	Three Years of Textile Drying Research	443
Microscopic Examination of Cotton Fibres in Cuprammonium Hydroxide Solutions	323	Tube for Studying Dilute Sediments	280
Moisture Control: Practical Application in Rayon Slashing	526	Twist Determination in Single Yarns	120
Regain of Acetylated Silk Fibroin	126	Viscose Rayon: Stress-Strain Properties, Effect of Specimen Length	287
Relations of Textile Fibres at Elevated Temperatures	357	Effect of Rate of Load	316
		Effect of Relative Humidity	372

Author Index

	PAGE		PAGE
Beavers, Ellington M. Tube for Studying Dilute Sediments	280	Cotton	405
Bellinson, H. R. Twist Determination in Single Yarns	120	Steinhardt, Jacinto and Harris, Milton. Combination of Wool Protein with Acid and Base: Hydrochloric Acid and Potassium Hydroxide	181, 229
Viscose Rayon: Stress-Strain Properties, Effect of Specimen Length	287	Walker, Albert C. Three Years of Textile Drying Research	443
Effect of Rate of Load	316	Whistler, Roy L., Martin, Albert R. and Conrad, Carl M. Pectic Substance of Cotton Fibres in Relation to Growth	449
Effect of Relative Humidity	372	Whistler, Roy L., Martin, A. R. and Harris, Milton. Determination of Uronic Acids in Cellulosic Materials	109
Bergmann, Werner. Relations Between the Food and Silk of Silkworms	462	Pectic Substance in Cotton and Its Relation to the Properties of the Fibre	269
Burdett, P. H., Magoffin, J. E. and Cameron, F. K. Influence of Electrolytes on the Ballo-Electric Effect	149	Whitford, A. C. Guanaco Fibres	22
Burns, Robert H. Sampling of Domestic Wool for Shrinkage Determination	193	Wiegerink, James G. Effects of Drying Conditions on Properties of Textile Yarns	493
Carr, Edward. Moisture Regain of Acetylated Silk Fibroin	126	Equipment for Conditioning Materials at Constant Humidities and Elevated Temperatures	334
Clanton, B. R., Cameron, F. K. and Magoffin, J. E. Removal of a Sulfur Black Dye from Suspension by Flotation Methods	201	Moisture Relations of Textile Fibres at Elevated Temperatures	357
Fox, Kenneth R. Refractive Indices of Textile Fibres: Double Variation Method for the Determination of	79	Winn, Lelia J. and Schwarz, Edward R. Technical Evaluation of Textile Finishing Treatments, Flexibility and Drape as Measurable Properties of Fabric	5
Hertel, K. L. Method of Fibre-Length Analysis Using the Fibrograph	510	Use of Rank Correlation for Comparison of Data	453
Hock, Charles W. and Harris, Milton. Microscopic Examination of Cotton Fibres in Cuprammonium Hydroxide Solutions	323	Yelland, William E. Behavior of Gelatins and Glues in Size Baths at Low Concentrations	341
Rutherford, Henry A. and Harris, Milton. Concerning the Existence of Fractions of the Sericin in Raw Silk	221	Determination of Regain of Sized Rayon Warps: Checking the Efficiency of One Type of Warp Conditioner	420
Photochemical Decomposition of the Cystine in Wool	17	Moisture Control: Practical Application in Rayon Slashing	526
Saxl, Erwin J. Compression Tests on Rayon Flock	425	Result Obtained by Use of an Oil-type Size on Viscose Rayon	446
Sookne, A. M., Fugitt, C. H. and Steinhardt, Jacinto. Electrodialytic Estimation of Ash and Acidic and Basic Groups in Textile Fibres	380		
Sookne, A. M. and Harris, Milton. Relation and Cation Exchange to the Acidic Properties of

Methods: New Views on Effect of Various—on Staple Fibre Fabrics	141	Iron Stains on	170
of Wool: Use of Fat Solvents in	482	lanital Mixtures: Dyeing	396
Washing-off Process in Scouring (of Wool Cloth)	210	Manufacture: Weathering of the Fleece in Relation to	299
Waste Silk: Fermentation Degumming of	478	Mean Fineness of—-and Standard Deviation	38
Wastes: Treatment of Liquid—from the Textile Industry	352	Method for Promoting the Removal of Mineral Oil from—by Emulsification	533
Water of Constitution and Water of Hydration of Animal and Vegetable Textile Fibres	299	of Titration for Determining Damage to	102
Repellency and Temperature	214	Mordanting—in the Cold	172
Repellent: New Type	304	New Synthetic Textiles in Relation to Photochemical Decomposition of Cystine in	312
Waterproofing Agent: Aluminum Triformate as a	438	Piece Goods: Solvent Extraction of	134
Waterproofness of Fabrics: Testing of	141	Prevention of Damage to—by Bacteria	212
Weave: Effect of—on Structure of Cotton Fabrics	168	Principles of Isoelectric Washing of	30
Weaving Covered-Rubber Yarn	482	Printing: Technique of	349
Weft: Tension on the—during Weaving	96	Quantitative Method of Determining Slight Injury to	102
Wet Fabrics: Moisture Removal by Centrifuging, Suction and Drying Processes	96	vs. Rayon	257
Processing of Textiles: Application of Surface Active Agents in	306	Recent Developments in Methods for Shrink-proofing	136
Wettability and Rate of Evaporation of Fabrics: Procedure for Testing the	101	and Related Fibres: Action of Light on	131
Wetting Agents: Consideration of the A. A. T. C. C. Official and the Canvas Disc Methods for Evaluation of	214	Rubberizing of—-and Other Fibres, Yarns or Fabrics	133
The Official A. A. T. C. C. Method	214	Scouring: Efficiency in	97
New Uses for	90	Liquors: Rapid Control Method for Grease in	307
Winding Machinery: Modern	97	Some Effects of Alkaline Reagents on	477
Wool Acetate: Carbonizing	301	Staple Fibre Fabrics: Measuring Felting Power of	440
Action of Light on	95	Sulphur and Cystine—Determination in	400
(Artificial): Technical Specifications for Casein for the Production of	532	Uneven Dyeing of—-with Acid and Chrome Dyes	100
Base-Combining Capacity of	132	Use of Fat Solvents in Washing of	482
Carbonizing	210, 347	Warps: New Size for	97
Causes of the Damaging Effect of Fat Solvents in the Degreasing of Crude—by Benzine and Trichloroethylene	349	and Wool Fabrics: Rapid Determination of Moisture in	173
Chlorination of	483	Woolen Carding: Analysis of Speeds in	97
Cloth Scouring Plant: Management of	210	and Spinning: Faults in	28
Colors: Dyeing Cellulose Fibres with	31	and Cotton Yarns: Modern Machinery for Dyeing (and Drying) of—in Cheeses	31
Competitors of	531	Fibres: Bleached—Color Test for the Detection of	539
Completely Non-felting—and Its Use in Textile Materials	97	Gilding (Staining) of	29
Controlled Scouring of	347	Woolens and Worsteds: Finishing	169
Density of—in Relation to Acid Dyeing	536	Worsted Mills: Certified Climate in	168
Destruction of	347	Yarns: Count Variation in	101
Determination of Lanital in Tissues Mixed with	173		
Determining Acid in	102		
Dissociation of Ammonium Salts in Contact with	99		
Drying Problems	210		
Dyeing of—-by the Adsorption Method	260		
Fast to Perspiration	396		
Effect of Metals in	99		
Microscopic Observations on	261		
Particle Size in	35		
Significance of Temperature in	138		
Electrophoretic Studies of	167		
Emulsion Oiling of Merino	393		
Enzymatic Digestion of	104		
Enzyme Treatment to Diminish Shrinkage	347		
Fabrics: Influence of Dyes and Dyeing Processes on the Milling, Strength, and Wearing Properties of Wool Fabrics	99		
Intensified Scouring an Added Protection in Finishing of	29		
for Printing: Use of Sulphuryl Chloride in Treatment of	138		
Tentative Standard Method for Measurement of Resistance to Shrinkage of	309
