

OLIVER CAMPBELL CANE MUD *Filtration*

- * Pays for the installation investment in one or two crops.
- * Simplifies handling of cachaza the day it goes into operation.

One of the first operating pictures to come in from South Africa. This Oliver Campbell Cane Mud Filter is one of many in that sugar country giving excellent accounts of themselves.

The above two statements summarize the basic value of the Oliver Campbell Cane Mud Filtration. There are, of course, many contributing factors such as :

- *85% or more reduction in sucrose loss over press operation.
- *Less inversion, re-adsorption and undetermined losses.
- *Higher purity filtrate.
- *Less wash-water and lower evaporation costs.

*Elimination of cotton filter press cloth washing machine and repairing.

*Clean, odourless, easily disposed of filter cake.

*One-man supervision; continuous and automatic operation.

It is not difficult to appreciate that the cane sugar factory operating without Oliver Campbell Cane Mud Filtration is definitely handicapped.

WAREHOUSE PROBLEMS INCREASE— STOP HUMIDITY NOW!

What a Sisalkraft "We first used Sisalkraft
User Says: under the bags where the
results were very good.

Its use was then extended to cover the sides of the piles for additional protection. Last year we ran the paper length-wise, tucking it around the bag ends and using from 10 to 18 layers to determine what height it will be necessary to use it. (See illustration above.)

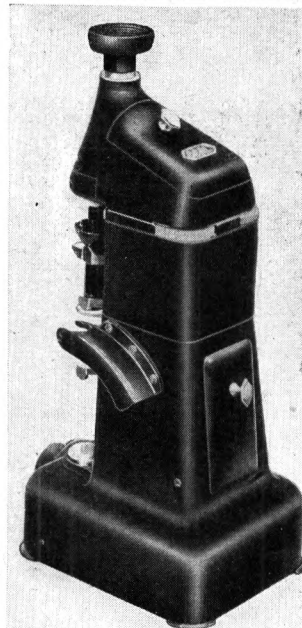

Prevents Dampness "We have tried tar-
and Mold paulin to cover these
piles but the results
are not satisfactory. The bags soon become damp and in a moldy condition which does not occur with Sisalkraft.

Sugar Unaffected "The sugar storage con-
By 80% Humidity ditions here are very
severe as we are located
close to the coast . . . The air is heavily laden with moisture—having a humidity of around 80%. At night the temperature falls below the dew point, and the air deposits its extra moisture on the sugar with a vengeance. However, Sisalkraft has solved the problem for us!"

Write for complete information today

If you are having trouble in storing your sugar you can profit from this company's experience. We suggest that you investigate the economy and ease of application of Sisalkraft.

Mister, you're mighty lucky to have those

TWINS*

*"Caterpillar"
TWIN Services

AND we are justifiably proud to be their Papa! They'll serve you well with a minimum of care and cost. We saw to that in the beginning.

TWIN Number One is called "Factory Built-in Service." His very important brother is "Dealer Quality Service." Together, they bring vigorous, dependable, round-the-calendar **PERFORMANCE** from your "Caterpillar" Diesel equipment.

For example, Number One represents "Caterpillar's" basic engineering skill and precision workmanship which have given you

- (a) *Simplicity of design and operation.*
- (b) *The ability to work in any climate, on any job.*
- (c) *The ability to burn a wide variety of fuels.*

(d) *Proved—again and again—dependability.*

Number Two—"Dealer Quality Service"—offers you

- (a) *Factory-trained service men.*
- (b) *Modern shops.*
- (c) *Special tools.*
- (d) *Money and metal saving repair methods.*

This particular "TWIN" is vitally essential to you right now. Make it a point to see him regularly!

There is scarcely a "Caterpillar" Diesel Tractor, Motor Grader, Engine or Electric Set—regardless of age or usage—that hasn't a lot of dependable working hours left in it. "Dealer Quality Service" will help you keep it on the job.

REMEMBER

THE FIGHTING FOUR

INSPECT. Look your equipment over frequently. For expert "internal" inspection, call in a trained "Caterpillar" Service Man. Read your Operator's Instruction Book.

LUBRICATE. Use the right oil at the right time in the right place and in the right quantity. Keep it clean and replace before it deteriorates.

ADJUST. Tighten all bolts. Keep valves and clutch in proper adjustment. Read the Operator's Instruction Book.

REPLACE. Have "Dealer Quality Service" recondition or replace worn bearings, cylinder liners, clutch linings and other parts vital to restored power and extended engine life.

DICALITE FILTERAIDS

...make filtration faster, easier, and more efficient — increase production of highest purity sugars and reduce filtration costs.

Nine grades of Dicalite filteraids are available for sugar filtration, giving a wide range to meet requirements of all types of sugar liquors. Shipments are made in multi-walled paper bags protecting the contents against moisture or odor pick-up, and against sifting.

Dicalite filteraids give higher filtration flow-rates with brilliant clarity of sugar liquors. Because all suspended solids are removed, even colloidal matter, these liquors process better, yielding the greatest amount of high purity sugars. All Dicalite filteraids are uniformly high in quality and can be depended upon for most economical and efficient results. Dicalite products are manufactured in TWO large plants, which is assurance of ample, uninterrupted supply, and prompt shipments. Your inquiries are invited, and literature regarding use of Dicalite filteraids in sugar filtration will be gladly sent on request.

REPRESENTATIVES IN MOST
SUGAR PRODUCING COUNTRIES

BEST —for every sugar cane grower

Many years' study of the requirements of cane growers enables us to produce ploughs to meet all needs, from the light steel single furrow share plough weighing about 60 lbs. to the 4-furrow "Shugadisc" TD.9A for burying cane trash, and weighing nearly 3 tons.

The "SHUGADISC"

For ploughing in trash, made in 2 types—the TD.7A, 2 and 3 furrow for average conditions, and TD.9A, 2, 3 and 4 furrow for the hardest, roughest work.

C.17 CULTIVATORS

Massive self-lift tractor cultivators for breaking up very hard land, off-barring, etc.; 5, 7 or 9 tines.

The "MARQUIS"

A self-lift tractor plough for the hardest working conditions, which turns furrows up to 14 in. wide by 12 in. deep. In 2, 3, 4 and 5 furrow sizes.

No. 3 "BARON" and No. 3 BARONET DISC HARROWS

Two double disc harrows for strenuous conditions. Widths from 5 to 12 ft.

RIDGERS.

With bodies for various sizes of ridges.

Ransomes

PLOUGHS and IMPLEMENTS

Ransomes also make a wide variety of ploughs and other implements for animal draught. Illustrated literature and all information will be sent on application.
